RE: Notice of Violation- Letter of Commitment
Underground Injection Control (UIC) Program,
Facility ID: PAS5A0410042

Dear Mr. Dradenstadt:

Based on an inspection of your facility by the United States Environmental Protection Agency (EPA) on January 7, 2014, and per your response to our Request for Information dated January 28, 2014, it has been confirmed that your facility is in violation of the Safe Drinking Water Act (SDWA), 42 U.S.C. §§300f-300j-11, and the Underground Injection Control (UIC) regulations promulgated under Sections 1421 and 1422 of the SDWA, 42 U.S.C. §§300h and 300h-1.

Specifically:

Paint Pro II is in violation of 40 C.F.R. §144.12 of the UIC regulations for operating a Class V injection well (floor drains discharging to a subsurface disposal system) which may allow the movement of fluids containing contaminants into underground sources of drinking water.

Such violation is subject to enforcement action under Section 1423 of the SDWA, 42 U.S.C. §300h-2. This Section provides for the initiation of civil and/or criminal actions in court or the issuance of Administrative Orders which mandate compliance with all provisions of the SDWA and regulations and which may assess penalties for violations.

However, because the facility inspection did not reveal a significant volume of wastewater disposal, the enforcement actions described above may not be necessary, provided you can assure that liquid contaminants will not discharge from your floor drains to the subsurface.

You may continue to use the prep area floor drain to wash cars provided that you limit your operations as specified in the enclosed Letter of Commitment. Vehicle maintenance operations, such as oil changes or brake service, may not be performed in the building, unless this drain has been permanently sealed.

You should either cement the floor drain in the paint booth, or keep it covered at all times during painting, allowing occasional use to rinse dust in the paint booth.

Within thirty (30) days of receipt of this notice, you must agree to the conditions in the enclosed Letter of Commitment, and return a signed copy of the Agreement to the Environmental Protection Agency. Retain a copy for your records.

Send all correspondence to the attention of Andre Hoyer, of my staff. Please include our mail code, 3WP22, on the outside of all correspondence to insure proper routing. We have included a return mailing label for your convenience.

We urge your prompt attention to this matter. A formal enforcement action with a penalty, as referenced above, may be initiated if we are unable to resolve this matter in a timely manner.

If you have any questions, please contact Andre Hoyer at (215) 814-5461.

Sincerely,

A handwritten signature in cursive script that reads "Roger Reinhart".
